ARV is a H2020 EU-funded project, coordinated by the Norwegian University of Science and Technology, involving 35 partners from 8 different European countries. The aim is to demonstrate and validate attractive, resilient, and affordable Climate Positive Circular Communities (CPCC) and contribute to the green renovation wave in Europe.

By the way ARV is the Norwegian word for “heritage” or “legacy”.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement no. 101036723
